ASSIGNMENT LIST

05/22/2015 19:24

ICS 204-CG (Rev.10/07)

## 8. Special Instructions

Instructions for Dead Wildlife and Natural Resource Protection.

Any LIVE oiled wildlife (birds, mammals, or sea turtles) observed or incidentally collected in clean up operations should be immediately called in to the Wildlife Hotline at 877-823-6926.

Any DEAD oiled birds, mammals, or sea turtles observed as part of cleanup operations should be called in to the team's supervisor. Supervisors can instruct the team in separating the oiled animal from the regular waste stream and (ideally) collecting it in a separate plastic bag, labeled with division/assignment area, and called into the Wildlife Hotline at 877-823-6926 for Recovery personnel to arrange pick up.

It is critical that clean up teams not dispose of dead marine organisms (invertebrates, crustaceans, anything other than birds or mammals). Stockpile it in a marked area above the high tide line and a Natural Resource Damage Assessment (NRDA) field team will come by around midday/before high tide to ID and catalogue the spill related mortality.

Do not operate vehicles or machinery on the beach within 1/2 mile of Coal Oil Point to protect Western Snowy Plovers.

Do not initiate any on-shore response or cleanup at Coal Oil Point without consulting the USFWS and California Dept of Fish and Game.

On Water: Avoid entering kelp beds as much as possible. Avoid boat traffic traveling near or through flocks of seabirds resting on water, stay 1000 ft away from nesting seabirds. If sea otter is observed keep clear and call Mike Harris immediately. 831-212-7090

1	0	each	Offshore Barge	David	805-755-3300	4	offshore OPS (fuel, food, mooring)	X
1	110	Feet	Offshore Supply Vessel John Henry					
4		each	29ft - 35ft Response Boat					
4		each	Portable Toilets					
1		each	Vessel OREGON, operate out of SB Marina					

## 7. Work Assignments

-Contain and Recover free floating oil. Surveillance Helo (Air Control #1) to direct offshore booming and recovery operations in a South to North configuration.

-Helo #1 will direct skimming operations in the nearshore areas to minimize oil impacting the shoreline.

-Task Force and Helo command and control will maximize oil encounter utilizing boom tow vessels. All boom boats secured at 2000 to Ventura

-Vessel will recover available free floating oil configured in 2 task force units.

Pull 600 feet of ocean boom in "U" configuration to collect free floating oil.

Offshore barge to anchor and provide fuel, food, and mooring.

## 8. Special Instructions

PPE: Tyvek Suits, gloves, safety goggles, hard hats, and neoprene boots to the work in containment areas. PFDs are required when working on the vessels.

-Site Safety Plan will be distributed via Ocean Sentinel on-scene. Offshore Response Team Member Report any distressed Wildlife to On-Water Group Leader Kyle Hanson @ 805-455-5502. Skimming vessels to off-load recovered product to the OCEAN KEEPER.

-Helo to direct boom tows to maximize encounter rates for skimmers (TF#1 OCEAN SCOUT / TF#2 OCEAN DEFENDER / TF#3 OCEAN SENTINEL)

-Direct all media inquiries to the PIO.

-Use of unauthorized Social Media is strictly prohibited.

During this operational period the Operational Section Chief may direct certain Vessels be removed from deployment for the purpose of decontamination and eventual demob.

Instructions for Dead Wildlife and Natural Resource Protection.

Any LIVE oiled wildlife (birds, mammals, or sea turtles) observed or incidentally collected in clean up operations should be immediately called in to the Wildlife Hotline at 877-823-6926.

Any DEAD oiled birds, mammals, or sea turtles observed as part of cleanup operations should be called in to the team's supervisor.

Supervisors can instruct the team in separating the oiled animal from the regular waste stream and (ideally) collecting it in a separate plastic bag, labeled with division/assignment area, and called into the Wildlife Hotline at 877-823-6926 for Recovery personnel to arrange pick up.

It is critical that clean up teams not dispose of dead marine organisms (invertebrates, crustaceans, anything other than birds or mammals). Stockpile it in a marked area above the high tide line and a Natural Resource Damage Assessment (NRDA) field team will come by around midday/before high tide to ID and catalogue the spill related mortality.

Do not operate vehicles or machinery on the beach within 1/2 mile of Coal Oil Point to protect Western Snowy Plovers.

Do not initiate any on-shore response or cleanup at Coal Oil Point without consulting the USFWS and California Dept of Fish and Game.

On Water: Avoid entering kelp beds as much as possible. Avoid boat traffic traveling near or through flocks of seabirds resting on water, stay 1000 ft away from nesting seabirds. If sea otter is observed keep clear and call Mike Harris immediately. 831-212-7090

<b>ASSIGNMENT LIST</b>		05/22/2015 21:28		Casey Hren	

Any LIVE oiled wildlife (birds, mammals, or sea turtles) observed or incidentally collected in clean up operations should be immediately called in to the Wildlife Hotline at 877-823-6926.

Any DEAD oiled birds, mammals, or sea turtles observed as part of cleanup operations should be called in to the team's supervisor. Supervisors can instruct the team in separating the oiled animal from the regular waste stream and (ideally) collecting it in a separate plastic bag, labeled with division/assignment area, and called into the Wildlife Hotline at 877-823-6926 for Recovery personnel to arrange pick up.

It is critical that clean up teams not dispose of dead marine organisms (invertebrates, crustaceans, anything other than birds or mammals). Stockpile it in a marked area above the high tide line and a Natural Resource Damage Assessment (NRDA) field team will come by around midday/before high tide to ID and catalogue the spill related mortality.

Do not operate vehicles or machinery on the beach within 1/2 mile of Coal Oil Point to protect Western Snowy Plovers.

Do not initiate any on-shore response or cleanup at Coal Oil Point without consulting the USFWS and California Dept of Fish and Game.

<b>7. Work Assignments</b> Collect water and sediment samples per the environmental sampling and analysis plan. Plan is pending approval																																			
<b>8. Special Instructions</b> -Comply with HASP ( Health and Safety Plan ) -Beware of foot placement---Eyes on Path  Instructions for Dead Wildlife and Natural Resource Protection.  Any LIVE oiled wildlife (birds, mammals, or sea turtles) observed or incidentally collected in clean up operations should be immediately called in to the Wildlife Hotline at 877-823-6926.  Any DEAD oiled birds, mammals, or sea turtles observed as part of cleanup operations should be called in to the team's supervisor. Supervisors can instruct the team in separating the oiled animal from the regular waste stream and (ideally) collecting it in a separate plastic bag, labeled with division/assignment area, and called into the Wildlife Hotline at 877-823-6926 for Recovery personnel to arrange pick up.  It is critical that clean up teams not dispose of dead marine organisms (invertebrates, crustaceans, anything other than birds or mammals). Stockpile it in a marked area above the high tide line and a Natural Resource Damage Assessment (NRDA) field team will come by around midday/before high tide to ID and catalogue the spill related mortality.  Do not operate vehicles or machinery on the beach within 1/2 mile of Coal Oil Point to protect Western Snowy Plovers.  Do not initiate any on-shore response or cleanup at Coal Oil Point without consulting the USFWS and California Dept of Fish and Game.

<b>DAILY MEETING SCHEDULE</b>		05/22/2015 19:24		ICS 230-CG (Rev 07/08)	

<b>1. Incident Name</b>		<b>2. Operational Period (Date/Time)</b>		<b>Operational Period</b>	<b>RESOURCES AT RISK SUMMARY</b>
Refugio Incident		From 05/23/2015 06:00 To 05/24/2015 05:59		Ops Period 3	ICS 232-CG
<b>3. Environmentally-Sensitive Areas and Wildlife Issues</b>					
Site #	Priority	Site Name and/or Physical Location		Site Issues	
4-601	A	Gaviota Creek		<p>•Whenever the creek mouth is open (much of the year, depending on rainfall) wetland biota, including Steelhead trout, Tidewater goby, red-legged frog, arroyo chub, southwestern pond turtle, two-striped garter snake, coast range newt, waterfowl and saltwater and freshwater marsh habitats are at risk.</p> <p>•Rest of the year for seabirds, shorebirds and waterfowl, harbor seals, and California sea lions, also eel grass beds in nearshore area. Steelhead movement occurs in this area Dec. thru March. Tidewater gobies nest April thru June. Southwestern pond turtles, newts and red-legged frogs overwinter on or near the banks and upland areas along the creek.</p> <p>•Amphibian eggs and tadpoles occur (Dec-Sept) and could be injured by response. Brown pelicans, gulls, terns and other seabirds and waterfowl. Harbor seals and Calif sea lions.</p> <p>•Sea otters have been known to move through the nearshore area. Steelhead trout (Dec-May), Rockfish (all year), Calif barracuda, Top smelt (all year), Yellowtail rockfish (all year), Tidewater goby.</p>	
4-605	C	Canada Del Alcatraz and Cementario Creeks		<p>• Cementerio Creek is a watering spot for monarch butterflies (hence the name of the off ramp from Hwy 101- Mariposa Reina). There are patchy riparian and wetland habitats on Alcatraz and Cementerio Creeks.</p> <p>• Eucalyptus and live oak woodlands dominate the watershed along the Plains Exploration facility north of Hwy 101. Brown pelicans, Gulls, Terns and other seabirds and waterfowl.</p> <p>• Sea otters have been known to move through the area.</p>	
				<p>Narrative: This 9.1 mile stretch of coast is characterized by isolated narrow cobble and sand beaches and is backed by high wave washed coastal bluffs. The shoreline is obstructed along much of its length by exposed bedrock outcroppings, rocky promontories that extend well into intertidal areas (east of Gaviota State Park, vic. Cementerio and Alcatraz Creeks, and cliffs at west end of Refugio State Beach). The configuration and nature of shorelines in this area change depending upon ocean and weather conditions and sand loss and replenishment.</p>	
				<p>T&amp;E Species Concerns: Steelhead, Tidewater Goby, Red-legged Frog, Least Terns, Sea Otters. Water Contamination- Unhealthy levels of coliform bacteria have been found intermittently in streams and on beaches in the Santa Barbara County area. Check with Santa Barbara Ocean Quality Hotline: 805-681-4949, regarding health conditions prior to engaging in any activities which would require direct water contact. Use appropriate PPE, safety procedures, and include reference to potential health problems in any site safety plan.</p>	
<b>4. Archaeo-cultural and Socio-economic Issues</b>
